Port Forwarding My Cloud Wd When a connection comes from the outside though, on the ports 9080 or 9443 of your router WAN side, your router will forward the traffic to your NAS on the corresponding ports. Make sure you have set up the port forwarding in the router, and that you have specified in the NAS which ports you have setup. Wagebot. Port forwarding - My Cloud - WD Community Try to forward external port 8080 to the NAS port 80, and external port 8443 to the NAS port 80. Make corresponding changes in the NAS UI and reboot the NAS. Also, in your router, look at the DHCP setting and assign an IP manually to the NAS

(you can keep the same IP it has now, although some users recommend to assign a fixed IP address outside of the DHCP range - routers should be able to take care of this) How to port forward WD? - My Cloud - WD Community Port Forwarding is used when you attempt to access information on your NAS box without first communicating information through WD servers (i.e. if you are not using WD apps, but your own private connections directly through windows). On the WD NAS boxes, HTTP and HTTPS generally default to ports 80 and 443. Port forwarding issue - My Cloud EX2 - WD Community OK just so I understand, you can port forward (within the router) ports 80/443 to the corresponding ports 80/443 on the My Cloud. But if you

use any other port numbers the port forwarding fails. Correct? If so what happens if you change only one of the port numbers and not both as a troubleshooting step. Port Forwarding Not Working? - My Cloud - WD Community I setup up a 'game/application' port forwarding rule on my router, for TCP/UDP and ports 80 and 443, and applied that rule to one device, and used the manual remote access configuration for Cloud Access for that device. After toggling the cloud access switch off and back on, this is now working in port forwarding mode. Port forwarding for two My Clouds - My Cloud - WD Community My Cloud Dashboard always showed "Port forwarding connection established" and Connection Status: Connected in Cloud Access menu,

but still remote access was lost after a while... I set port forward on the router 9091 >80 and 9444 > 443 and this allowed remote access to Dashboard without any issues using my public IP address with <https://163.xxx.x.xx:9444> Solved: Remote My Cloud web access stopped...UPnP, port ... So do you need to port forward the WD 2TB My Cloud? 40 comments. share. save hide report. 100% Upvoted. This thread is archived. New comments cannot be posted and votes cannot be cast. Sort by. best. level 1. 3 points · 3 years ago. Only if you want to access it when away from home via WD's cloud service. Do you have to port forward the WD 2TB My Cloud ... When I manually configure port forwarding on my MyCloud and my

router using external port 9091 and 9444 as follows (9091->80 and 9444->443) it works. Problem with port forwarding - My Cloud - WD Community © 2020 Western Digital Corporation or its affiliates. All Rights Reserved. Privacy Statement Terms of Use Trademarks Please select the product for ... - Western Digital Your remote clients and the NAS must access WD's servers whether you're using port forwarding or not. WD does its own dynamic DNS in order to find your NAS using a wd2go.com hostname, so your NAS must communicate with WD's servers any time your address changes.. There's basically two ways to set it up - you let the NAS pick the ports, and it uses UPnP with your router to establish ... Port forwarding failed to connect

on port ... - WD Community Steps: Enabling the Router's UPnP Table. From your system's web browser, sign in to your router's web access page. Navigate to the Attached devices or UPnP section. Locate your routers port mapping table and make sure that the Turn UPnP ON option is enabled. Check if 192.168.0.35 is displayed in the IP address field. WD My Cloud Remote Access | Steps to Enable Router UPnP Hi, the uPnP has already been enabled, but port forwarding still fails. I am on My Cloud, not My Book Live. From WD website, I need to forward 2 ports (8080, 8443) My Cloud is set to a static IP. I need to know what parameters to key in on the Advance/NAT page. Remote Host, External Start Port, External end Port,

Internal Port, Internal Host ... Port Forwarding on Huawei 256s for WD My Cloud | GreenR ... When browsing the web page and registering the device, a standard HTTP connection on port 80 is used. For the login and file access, port 9000 and port 10080 are used. If port 10080 is in use, the system will try 10081, 10082, etc. until 10100. If port 10080 is open on both the network where the network drive (MyCloud) is connected as well as on the network where the computer is currently connected, the communication becomes direct peer to peer. [MyCloud] What ports are used for the remote connection ... Port forwarding a Network Attached Storage device on your home network. You may also want to check out my latest
